-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1732

DETAILED ACTION

1. The rejection of claims 2, 3, 5, 6, 28, 29, 31, 32, 36, 37, 50 and 51 under 35 USC § 103(a) set forth in the previous Office Action (mailed on 05 July 2005) is withdrawn in favor of the following new grounds of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 28, 29, 5, 6, 24, 36, 37, 31 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Bourrieres (U.S. Patent 4,878,984 A).

Bourrieres (see the entire document, in particular, col. 3, line 33 to col. 6, line 30; col. 6, lines 52-53) teaches a filament-winding process including the steps of winding a group of filaments simultaneously onto a substrate, reversing direction and providing a guide assembly (e.g., forks 21a, 21b) as set forth in the instant claims.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, 3, 50 and 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bourrieres (U.S. Patent 4,878,984 A) as applied to claims 28, 29, 5, 6, 24, 36, 37, 31 and 32 above, and further in view of Goldsworthy et al (U.S. Patent 3,701,489 A).

Goldsworthy et al (see the entire document, in particular, col. 10, lines 31-45; col. 16, lines 25-30) teach a filament-winding process including the step of anchoring filaments at a desired location, and such would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of Bourrieres in view of Goldsworthy et al principally in order to maintain the filaments in a stationary position in order to commence the winding process.

Response to Arguments

6. Applicant's arguments with respect to claims 2, 3, 5, 6, 24, 28, 29, 31, 32, 36, 37, 50 and 51 have been considered but are moot in view of the new ground(s) of rejection.
